Module Exam (ME, graded)

Partial Module Exam (PME, graded)

Performance Record (PR, not graded) Partial Performance Record (PPR, not graded)

Contact Hours per Week (CHpW)

2 Learning outcomes / competencies

- a) The students will develop an understanding of media systems and their role in development. They will learn how media systems differ across regions and explore the significance of these differences for media reception and societal development. Students will also examine the dynamics that drive changes in media systems and gain insight into essential concepts such as press freedom, journalism cultures and media accountability. Through discussions about media systems and journalism practices from around the world, students will be equipped to analyse the complex interconnections.
- b) Students learn about the different approaches, principles and effects of media development.
- c) Students are familiar with development theories and fields of action within development politics. They can identify development and culture within a historic context and learn to critically examine the different concepts in relation to different schools of development theory. Throughout the seminar, ideas about sustainable development will be measured against the reality on the ground. Students will be encouraged to use their journalistic skills to prepare concise presentations of in-depth studies, influential books and various case studies.
- d) Students acquire the necessary competencies to differentiate between various scientific principles and independently write academic papers (term papers, excerpts, discussion papers, research project papers, master theses). In addition, they evaluate the works of other authors on formalities while recognizing and naming the relevant norms and standards. Students can adequately deal with academic literature and navigate through the systems of a university library (e.g. catalogues, databases), and they will accumulate knowledge of how to avoid plagiarism.

3 Module Content

- a) Comparative Media Systems
 - Press Freedom and Democracy
 - Journalism cultures
 - Media Systems Definition and basis connections
 - Comparing Media Systems Typology
 - Media System Theories
 - Free Press, Media Accountability and Human Development
 - International Broadcaster
 - Regional Perspectives (Africa, Asia, North- and Latin America, Arabic World)
- b) Media and Development I
 - Media development versus media for development
 - Human rights-based approach
 - Media freedom and media freedom indices
 - Media viability
- c) Media and Development II Sustainable Development as Promise and Paradox
 - Introduction to Development Theories
 - Modernisation Theory, Dependency Theory, Livelihood Approach
 - Concept of Sustainable Development as a promise and a paradox
 - Key declarations of sustainable development by the UN Conference on Environment and Development (UNCED),
 Sustainable Development Goals (SDGs), the United Nations Framework Convention on Climate Change (UNFCCC)
 - Key ideas from feminist, post-development and Marxist development theory in relation to the environment.

d) Academic Work

- Scientific Principles and Standards
- Conceptualizing and Structuring Academic Works
- Types of Academic Texts
- Research Process and Research Typology
- Source Selection, Citation and Reference List
- Academic Writing und Excerpting
- Avoiding Plagiarism

4 Participation Requirements

None

5 Method of Examination

- a) + b) + c): Written exam (exam duration is 100 minutes)
- d): Portfolio

6 Credit Points Requirement

Pass the module exam.

7 Weight of Grade for Final Score

Graded according to § 22 Para. 2 of the examination regulations (MPO).

8 Module Representative and Lecturer(s)

- a) Prof. Dr. Christoph Schmidt
- b) Dr. Esther Dorn-Fellermann
- c) Dr. Oliver Pye
- d) Dr. Almuth Schellpeper (module representative)

9 Selected Literature

Further reading material will be shared at the beginning of the course:

4 Participation Requirements

None

5 Method of Examination

Two-part module examination: weight of grade for final score: a) 60%, b) 40%

Ethnographic Exercises such as Observations and Interviews

- a) Term Paper
- b) Portfolio

6 Credit Points Requirement

Pass the two-part module exam according to § 10 MPO.

Collaboration in Multicultural Teams

Analysis of case studies and 'critical incidents'

7 Weight of Grade for Final Score

Graded according to § 22 Para. 2 of the examination regulations (MPO).

8 Module Representative and Lecturer(s)

- a) Dr. Maryann Egbujor (module representative)
- b) Dr. cand. Mira Keßler

	b) <u>Lecture:</u> Media Ethics		ledia Ethics		l		30 Students	
	c) <u>Lecture:</u> N	Media Law	1 SWS / 15 h	l	105 h			
	d) <u>Seminar</u> :	Media and Globali	zation	1 SWS / 15 h				

2 Learning outcomes / competencies

- a) The purpose of this lecture is to provide an overview of the role of communication in politics and society, with a particular focus on the role of digital media. Students know the essential characteristics of mass media and social media and are familiar with their structures, functions, and forms of reception. The lecture gives insights into the functions of political communication, frameworks, processes, information environment, and relevant theories. The students know about the emerging developments and challenges in the media landscape, including the impact of Artificial Intelligence, rumour, fake news, and misinformation on the actors of political communication.
- b) The students can understand and discuss themes rooted in media ethics, which are part of media, politics and society. They explore moral principles of media in democratic systems and are aware of questions related to media ethics and international standards of the journalistic profession.
- c) The students discuss topics connected to the field of media, politics and society in the context of media law and regulations and they know how to deal with legal questions in the media. They can identify judicial principles of media in democratic systems and are familiar with media law questions in national and international environments.
- d) The students understand the significance of mass media from a global perspective and can identify potentials and limitations of media globalization. They discuss different globalization theories and can compare them with each other. Global media formats with international audiences, global news flows and forms of global digital communication, for instance about climate crisis matters, including the impact of supranational media organization are also considered. In addition, the students analyse the role of media in globalization processes based on current case studies.

3 Module Content

- a) Political Communication
 - Theoretical Approaches to the Role of the Media in Politics and Society
 - Political Communication Frameworks and Actors
 - Basic Principles of Media Freedom and Media Control
 - Internet, Social Media, AI and Politics
 - Selected Topics, including Media and Elections, Media and Lobbying

b) Media Ethics

- Basic Concepts of Ethics
- Approaches in Media Ethics
- Professional Ethics, International Standards (Understanding of Journalistic Roles and Principles of Operation, Acceptance of Research Methods, Presentation and Editing of Journalistic Products)
- Selection Theories
- Internet and Computer Ethics
- Media Scandals and Limits of Media Ethics

c) Media Law

- Basic concepts of Media Law in international comparison
- Structures and actors of media regulation on national, European and global level
- Universal principles of Press Freedom and Freedom of Information
- Selected legal issues of journalistic work

d) Media and Globalization

- Theories of Globalization and Research Traditions
- Media Imperialism
- Economic, Political and Cultural Aspects of Media and Globalization
- Actors and Institutions of Global Communication (e.g. EU, OSCE, ITU, UNESCO)
- Global News Flows and Contra-Flows, Climate Crisis Communication
- De-Westernization of Media Communication
- Globalization and Digital Media Trends

Participation Requirements 5 **Method of Examination** Written module exam for all four subjects (exam duration is 120 minutes). **Credit Points Requirement** 6 Pass the module exam. 7 Weight of Grade for Final Score Graded according to § 22 Para. 2 of the examination regulations (MPO). 8 Module Representative and Lecturer(s) a) Dr. Saimum Parvez b) Prof. Dr. Caja Thimm c) Dr. Peter Niepalla d) Dr. Almuth Schellpeper (module representative)

90 h

2 Learning outcomes / competencies

c) Seminar: Forms of Journalistic Writing

Graduates have in-depth knowledge of key findings from media and journalism research. These are mainly the areas that form the scientific background for practical work in the media. Examples include theories of news selection, media-user typologies, different journalism cultures, digital tools and important results of impact research. Students can professionally use and evaluate different journalistic forms of presentation: news, interviews, reports, comments, and presentation. They have advanced knowledge of how to plan, organize and produce programs. They know that topics require different formats depending on the situation. The students master the most important techniques of quality control in editorial offices, inclusion of diversity, they know how constructive and viable broadcasting critique is done and can apply the appropriate criteria for the evaluation of different broadcast content and forms. Themes such as journalistic research, editorial mission statement and the training of journalists are familiar to them. Furthermore, the students reflect different journalistic quality standards and can develop research strategies. They strengthen their research skills - on- and offline- and are sensitized to the requirements in dealing with facts and the orientation towards a goal of objectivity. Furthermore, they are aware of different journalistic role understandings and practices and how it influences daily work practices. Against this background, participants can work in different contexts and in a participatory manner, especially regarding regionalisation and contextualisation.

3 **Module Contents**

1

- a) Journalism Theory
 - Definition and Functions of Journalism
 - Historical and Legal Foundations
 - Journalism as a Research Field
 - Journalism as a Profession
 - Broadcasting as a Public Duty
 - Journalistic Reporting Models (Information Journalism, Interpretive Journalism, Investigative Journalism, Social Science Journalism, Constructive and Solution journalism, Development journalism)
 - Journalism cultures
 - Journalism and Public Relations
 - Journalistic Quality Investigation

b) Research

- Basics of journalistic research, how to find a research topic and to develop a story
- Insight into digital and non-digital Research Methods and Tools, such as Interviews
- **Checking Sources and Facts**
- Creating a Survey Plan and Search Report
- Introduction to Internet Research
- Different journalistic approaches, such as Investigative Journalism and Constructive Journalism
- Diversity and Blind Spots in Journalism
- Practical Research Exercises and Discussion of Case Studies

Forms of Journalistic Writing

- News Formats (Statement, Report)
- Narrative Forms (Feature, Reportage, Portrait)
- Commenting Forms (Editorial, Commentary, Gloss)
- Forms of Utility (Service Formats)
- Dialogical Forms (Interview, Discussion, Conversation)
- Special Features of Journalistic Forms of Presentation in Radio, Television, Print and Online Media

4	Participation Requirements
	None
5	Method of Examination
	a) + b) + c): Portfolio
6	Credit Points Requirement
	Pass the portfolio exams.
7	Weight of Grade for Final Score
	Graded according to § 22 Para. 2 of the examination regulations (MPO).
8	Module Representative and Lecturer(s)
	a) Dr. Hao Gui
	b) Dr. cand. Mira Keßler (module representative)
	c) Grahame Lucas

2 Learning outcomes / competencies

- a) Media and economics are interconnected, with each playing a pivotal role in society. Media not only serve as significant economic factors but also function as essential channels for shaping public perception, upon which businesses heavily rely. Students develop a comprehensive understanding of fundamental economic models and their application within media companies, along with gaining knowledge of the structures that govern the media economy. The course covers the unique characteristics of media companies from both economic and operational perspectives, including industry-specific organizational structures and operational methods. Students learn to distinguish media companies as unique business entities and gain insights into key business management approaches, such as SWOT analysis and DISG, and explore the challenges and opportunities presented by digital business models.
- b) Students have knowledge of organization structures in media companies and are familiar with various roles and decision-making processes within media enterprises. During excursions to different media enterprises students encounter the peculiarities of the respective organization structures. In addition, students can analyze management processes and their sub-functions as well as demonstrate knowledge of structural and procedural organization. Furthermore, students can initiate decision-making processes on an applied scientific basis (e.g. change management processes). Students are also equipped with entrepreneurial knowledge (e.g. creative innovate thinking, developing sustainable business models and the concept of media viability) required for creating and successfully operating high-growth-potential and profitable media start-ups and other enterprises.

3 **Module Content**

- General Media Economics
 - Definition and Classification
 - Media Markets and Media Products
 - Media Markets (Program Markets, Procurement and Distribution Markets, Finance Markets, Job Markets)
 - Media Enterprises, , Revenue Models, Core Competencies
 - Strategic Management of Media Enterprises
 - Procurement Management and Production Management
 - Newspaper and und Magazine Market
 - **Broadcasting Market**
 - Internet Market
 - Selected Topics of Media Economics
- b) Media Organization
 - Principles of Organization (Organization und Enterprises, Effectiveness and Efficiency)
 - Structural and Procedural Organization (Features, Types, Merging und Coordination of Organizational Units)
 - Organizational Differentiation and Integration
 - Organizational Units as Elements of Structural Organization
 - Organization Concepts (Functional, Divisional, Matrix, Tensor and Holding Organization)
 - Entrepreneurship and Start-Up Management

4 **Participation Requirements**

None

Method of Examination 5

Written module exam for both subjects (exam duration is 120 minutes).

Credit Points Requirement 6

Pass the module exam.

7	Weight of Grade for Final Score
	Graded according to § 22 Para. 2 of the examination regulations (MPO).
8	Module Representative and Lecturer
	a) + b): Prof. Dr. Christoph Schmidt (module representative)
9	Selected Literature Further reading material will be shared at the beginning of the course:

2 Learning outcomes / competencies

Students have advanced media literacy, skills and abilities in the fields of digital multimedia, video / audio and programming. Within one of the media genres of digital multimedia, video / audio and programming for journalists, students create products for the web. The students are sensitized to the aesthetic and technical conditions of practical media production and have the competence to create high-quality digital products on a professional basis.

a) Media Project - Digital Multimedia

The students have advanced media-practical knowledge of multimedia design and production. They know different graphics, audio and video formats as well as authoring systems and databases. The students have the ability to realize demanding multimedia applications and are able to independently design and prototype multimedia applications. They, furthermore, know the advantages and disadvantages of the functions of smart speakers. These voice command devices offer interactive actions and hands-free activation with the help of one "hot word". The students know the function of components such as Wi-Fi and Bluetooth connectivity that customers need to interact with the tool. They know the programming behind the smart speaker as a device that informs about the weather and traffic, functions as a dictionary and serves as a 'home assistant' that can provide control of common household tasks and more.

b) Media Project – Smart Tools for Videoconferencing and Cyber Security

The students can deal with modern enterprise video communications, with easy, reliable cloud platforms for video and audio conferencing, chat, and webinars. They acquire skills to create advanced video and audio pieces. They also gain the expertise to safeguard themselves from cyber-attacks.

c) Media Project - Programming

How do computers think? Software applications, apps and algorithms are increasingly determining our life. The students get practical insight into the work of programmers and how applications can be designed. The seminar helps them implement small projects and improve management of larger projects.

3 Module Content

- a) Media Project Digital Multimedia
 - Usability of Online Media
 - Design Rules (Multimedia Design)
 - Planning of Online Research
 - CMS and Blog Software
 - Community Management
 - Online Marketing (including Search Engine Optimization)
 - Online Texts
 - Use of Links, Design of Start and Rubric Pages
 - Online Specials (Audio Slideshows, Specialist Blogs, Online Dossiers)
- b) Media Project Smart Tools for Videoconferencing and Cybersecurity
 - Introduction to the Possibilities of Video- and Audioconferencing
 - Introduction to Camera Technology and Sound Engineering
 - Introduction to Various Editing Systems
 - Remote Work
 - Cybersecurity Systems
- c) Media Project Programming
 - Introduction: Why Coding for Journalists?
 - Overview: Which Languages are There and Which One is for What?
 - Setup: Which Coding Tools Do We Need?
 - Getting Started: Learning Coding (a Few HTML and CSS Exercises)
 - Introduction to Illias: Tasks and Quizzes

Media Project Programming

Reading material and references will be shared in class.

c)

Goal: Developing an Own Program at the End of the Phase Construction: Basics First, Scrape Data, Visualize Data **Participation Requirements** The media projects the students can register for are announced at the beginning of the respective semester. The project work takes place as a block event. **Method of Examination** Performance record in the form of a product / work piece or application-oriented work accompanied by documentation. 6 **Credit Points Requirement** Successful provision of a performance record. Weight of Grade for Final Score 7 None, the module is not graded. 8 Module Representative and Lecturer(s) a) b) N.N. N.N. c) **Selected Literature** Further reading material will be shared at the beginning of the course: Media Project Digital Multimedia DeWolk, Roland (2001): Introduction to online journalism. Publishing news and information. Allyn and Bacon. Rusch, Doris Carmen (2006): Online-Journalismus. Lang. Krug, Steve (2006): Don't make me think. A common-sense approach to web usability. News Riders Publishing. Quinn, Stephen (2005): Convergent journalism. The Fundamentals of Multimedia Reporting. Lang. Media Project Smart Tools for Videoconferencing and Cyber Security Reading material and references will be shared in class.

2 Learning outcomes / competencies

- a) The students acquire knowledge about important theoretical concepts, which are necessary for the understanding of media communication. They are familiar with conceptual and theoretical thinking patterns, know basic theoretical concepts and models in media science and have profound knowledge in the field of media effects, including the concept of public opinion.
- b) In the field of empirical methods, students get to know the methods of empirical social research (selection procedures, survey methods and evaluation methods). They can understand and use quantitative and qualitative methods. Furthermore, they have basic knowledge of sampling theory and scaling and have developed an awareness of measurement problems and empirical distributions.
- After the research seminar, students can develop and work on a concrete question in empirical media research in a methodologically appropriate way (using the appropriate methods). The students can prepare and carry out field research.
- d) In this seminar students will accumulate knowledge about the concept and elements of "new" media, focusing on the profound influence of technology on media landscapes. They will explore the functions and challenges associated with communication on the internet, considering the cultural effects that arise from these digital interactions. The phenomenon of media convergence will be examined in depth, alongside its related consequences for both traditional and digital media forms. Students will also delve into the concept of innovation, understanding its role in shaping the evolution of media technologies. Beyond knowledge acquisition, students will critically assess competing theories concerning technology and culture, positioning these within the context of current debates in media studies. The course will emphasize the practical application of these theories, encouraging students to apply their insights to concrete examples and case studies, thereby bridging theoretical understanding with real-world media practices.

3 Module Content

- a) Media and Communication Science
 - Notions, Fields and Processes
 - Research Approaches and Models in Communication Science
 - System Theory and Constructivism
 - Media Effects and Media Effects Research
 - Perspectives of Media and Communication Science
 - The Concept of Public Opinion
 - Current Questions and Debates within Media Science
 - International Research Projects

b) Empirical Methods I

- Definitions and Basic Concepts of Empirical Research
- Philosophy of Science, Research Logic and Indicators
- Hypothesis and Theory Formation
- Operationalization and Measurement Theory
- Quantitative and Qualitative Research Approaches
- Method Catalog of Empirical Social Research (e.g., Survey, Content Analysis, Observation, Experiment)
- Selection Procedure (Sample Design)
- Method of Reception and Media Usage Research
- Market / Opinion Research
- Online-Research
- Classical Qualitative Instruments and Procedures and their Limitations
- Practical Exercises, e.g., Conception of Qualitative and or Quantitative Research Designs
- Application in Typical Fields: Individual Interview, Group Discussions, Experimental Research Designs

c) Research Seminar Empirical Methods I

- Conception of a Research Project
- Division into Groups with Different Research Questions
- Developing and Pretesting the Questionnaire
- Creation of Input Mask (PSPP)
- Conducting the Survey
- Data Entry into PSPP
- Creation of the Complete Data Set

d) New Media and Media Convergence

- New Media (Definition, Characteristics, Types, New Media vs Old Media)
- New Media: Determining or determined
- Impact of Technology on Journalism (Journalistic Practices, News content, Newsroom Systems, Audience Relation)

Updated: September 2024

- Network Society
- Media Convergence
- Impact of digitalisation on journalistic business models
- Public Sphere
- Filter Bubble Algorithms Echo chambers Criticism on Social Media
- New forms of Journalism
- Fake News and Verification, Digital Surveillance and Data Protection
- Gamification of Journalism
- Media Innovation
- Perspective into the future of journalism

4 Participation Requirements

None

5 Method of Examination

Written module exam for all four subjects (exam duration is 120 minutes).

6 Credit Points Requirement

Pass the module exam.

7 Weight of Grade for Final Score

Graded according to § 22 Para. 2 of the examination regulations (MPO).

8 Module Representative and Lecturer(s)

- a) Dr. cand. Mira Keßler (module representative)
- b) N.N.
- c) N.N.
- d) Prof. Dr. Christoph Schmidt

9 Selected Literature

2 Learning outcomes / competencies

The module builds on first the semester module "Media Economics" and equips students with key competences in these three areas of media economics: Controlling, Human Resource Management and Marketing/Public Relations, with which they are enabled to recognize decision-making alternatives and correlations in the three academic disciplines. Students gain profound scientific knowledge as well as applied practical skills in media management, which they acquire within the scope of case study presentations.

- a) Students possess the necessary basic theoretical knowledge, are acquainted with the characteristics of different controlling concepts and can apply the management functions of controlling using the relevant controlling instruments. They have a good command of essential terms and functions of cost-benefit calculations and can establish interconnections between the balance of accounts as well as profit and loss calculations. Furthermore, they acquire the competence to conduct planning and prognosis calculations for media enterprises, analyse target-performance variances as well as carry out feasibility studies/profitability assessments using benchmark comparisons. Through media-related exercises students are familiarized with the particularities of Controlling in media enterprises.
- b) In this seminar, students will gain a comprehensive understanding of Human Resource Management (HRM) and Development, particularly within the context of media enterprises. They will explore the key areas of operation and the critical success factors necessary for effective HRM. Students will learn what HRM and Personnel Management entail, emphasizing knowledge that is particularly valuable for future executives in the media industry. The seminar will equip students with the skills needed to systematically analyse and assess personnel-related issues and develop appropriate solutions. They will learn how to perform personnel requirement and staff analyses, initiate recruitment processes, and conduct job interviews. Additionally, students will become familiar with the tools and strategies of personnel development, while also understanding the ethical aspects of HRM. Special attention will be given to the concept of the "war for talent," which highlights the competitive landscape for attracting and retaining top talent. Students will also explore the roles of HR professionals in managing this talent and the application of Theory X and Theory Y in managing and motivating employees.
- c) More and more media outlets are competing for the attention of their recipients, and only those who can capture it can succeed on the media market. Students know the interrelations between production, design and marketing. They can analyse these interrelations and develop individual strategies for their "product". They have in-depth knowledge of the subject matter and the instruments of marketing as a market-oriented management tool for media enterprises. Special attention is paid to the instruments of the marketing-mix and students can evaluate the specific types of a marketing-mix in media enterprises. Students have knowledge of the various facets of essential public relations instruments.

3 Module Contents

- a) Controlling
 - Definition and Classification
 - Functions of Controlling
 - Controlling and Business Administration in Media Enterprises
 - Concepts and Systems of Controlling (integrated and multi-dimensional Controlling)
 - Cost Accounting as an Instrument of Controlling
 - Operative Planning and Budgeting (Finance Planning und Budget Planning in Media Enterprises)
 - Target Costing und Process Cost Accounting
 - Investment Controlling, Production Controlling
 - Key Indicators
 - Contrasting Controlling in Media Enterprises
 - Case Studies
- b) Human Resource Management
 - Definition of Terms and Categorization (HRM, HRD)
 - Strategic Human Resource Management in Media Enterprises
 - Applied Personnel Management (Personnel Planning, Personnel Recruitment, Personnel Placement, Personnel Cost Management, Personnel Management, Personnel Controlling)
 - Requirement Profiles for Employee and Management Positions in the Media Sector
 - Personnel Marketing

 Human Resource Development (Career Planning and Promotion, Educational/Training Needs, Company Apprenticeships and Further Training - Concepts and Trends)

Updated: September 2024

- Performance Management (Target Agreements, Appraisal Systems, Bottom-Up Feedback, 360° Feedback, Performance Review)
- Instruments for Identifying Potential (Assessment, Self-Assessment, Management Audit)
- The Learning Organization: Knowledge Management

c) Marketing/Public Relations

- Scope and Functions
- Marketing Planning
- Marketing Dimensions in the Media Sector (Philosophy, Method, Resources)
- Marketing Instruments
- Marketing-Mix (Product, Price, Distribution and Communication Policies) in Media Enterprises
- Selected Case Studies
- Media Marketing and Branding Management
- Corporate Communication and Public Relations

4 Participation Requirements

Formal: None

Content: The module builds upon "Media Economics".

5 Method of Examination

Written module exam for all three subjects (exam duration is 120 minutes).

6 Credit Points Requirement

Pass the module exam.

7 Weight of Grade for Final Score

Graded according to § 22 Para. 2 of the examination regulations (MPO).

8 Module Representative and Lecturer(s)

- a) Dr. Michael Sprenger-Menzel
- b) Prof. Dr. Christoph Schmidt (module representative)
 - Tessa vom Hagen

4	analyse situations and employ suitable leadership styles and strategies. The students are assigned a practical project through which they can apply the leadership theories they learned. Not only do they practice the day-to-day management of a media enterprise, the students are imparted with fundamental leadership skills such as interpersonal communication, decision-making, strategic and analytical thinking, efficiency and effectiveness as well as inspiring and motivating their teams. This hands-on approach allows students to identify their strengths and improvement areas, so that they are better prepared for future managerial and leadership roles. Participation Requirements												
		The electives students can register for are announced at the beginning of the respective semester. The students work on their media projects during a block event, held in the mandatory elective week.											
5	Method of Examination												
	documenta	Performance will to be assessed based on the ability to successfully participate in the practical project, accompanied by documentation or a presentation.

Elective III: Research Project (e.g. Media in Conflict, Digital Newsroom, International Journalistic Standards)

Cod	e	Workload	Credits	Se	mester		Frequency	Duration
	А3	120 h	120 h 4 2nd/3rd semester Every summer semester		2 semesters			
1	Elective Research Newsroo Influence practices		Contact hot per week 3 SWS / 45	eek study		Group size 10 Students		
2/ 3	Learning outcomes / competencies / module content During a pre-seminar in the summer semester students are to develop the theoretical framework, research focus an research questions for the project, and further devise a corresponding methodological approach. Individual dat collection, processing and evaluation should take place during the lecture-free period after the summer semester. The students 'findings are then to be presented for joint discussions during project week in October. Based on these presentations, further steps for the research project will be determined.							
4	Participation Requirements Students taking part in the research project are expected to delve into the topic in-depth and collect empirical data with their own individual research focus.							llect empirical data
5	Method of Examination Performance will to be assessed based on the ability to analyse a current topic, research and present the study results.							
6		oints Requirement all provision of a perf	ormance recor	d.				
7	_	f Grade for Final Sc module is not grade						
8		Representative (and Christoph Schmidt (n	-	ntative)				
9	Selected Literature Literature will be provided at the beginning of the course. Particularly relevant further reading will be compiled in a reader for the participants.							

2 Learning outcomes / competencies

From an organizational point of view, editorial and project management competencies along with profound knowledge of media planning and consumer research are an integral part of demanding professional and managerial positions within media enterprises.

- a) Students are enabled to take on strategic and operative managerial tasks in the media and communication field. They have in-depth knowledge of the theoretical, empirical and practical principles of editorial management. They are sensitized to the interrelations between editorial organization, journalistic quality and economic conditions, and know how editorial structures can contribute to ensuring and improving quality. They, further, possess profound knowledge of managing media organizations or media units and are familiar with factors for success in media organizations. Students understand leadership as a process of social influence and are able to characterize and apply alternative leadership styles. Furthermore, they are able to independently find information on current issues of editorial management in newsrooms.
- Students know the characteristic features of project management in media enterprises and are equipped with the competence to purposefully apply, analyse and evaluate project management methods and tools. Taking into consideration factors that influence a project's structure, students are aware of the exogenous and behavioural aspects of a project team and can adequately participate in project work.
- c) Students have in-depth knowledge of media planning and are able to carry out media research projects independently. They can analyse media research data and draw the necessary conclusions. Furthermore, they can plan and commission marketing campaigns.

3 Module Content

- a) Editorial Management
 - Instruments and Methods of Editorial Management
 - Editorial Systems and Organization
 - Editorial Marketing
 - Quality Management in the Newsroom
 - Journalistic Quality and Economic Pressures
 - Change Management
 - Communicating with Groups (including Running and Facilitating Meetings)
 - Leadership Theories
 - Leadership Styles, Methods and Techniques
 - Conflict Management Strategies

b) Project Management

- Managing Media Projects (Target Development and Definition, Project Organization, Decision-Making Hierarchy, Project Phases, Schedule Management, Opportunity-and Risk Analysis)
- Developing Project Contracts and Objectives (Client Specifications and Guidelines)
- Instruments/Methods of Project Planning (Project Structure, Project Environment Analysis, Network Scheduling Techniques, Milestone Analysis, Project Handbook)
- Motivating Project Teams (Models and Scope of Influence)
- Success and Failure Factors of Project Management
- Project Controlling (Cost Management, Quality Management, Reporting and Documentation of Projects)
- Managing International Project Teams (Role of Cultural Differences)
- MS-Project Software Tool to Support Project Work
- Case Studies Media Projects

c) Media Planning

- Media-Analysis
- Planning Media Campaigns
- Program Contents and Advertisement Placement
- Demands of the Advertising Industry for Market Research and Evaluation Departments
- Methods of Empirical Market and Media Research
- Quantitative Approach (e.g. Representative Studies, People meter, Customer Surveys, Online-Surveys)
- Quantitative Methods (In-depth Interviews, Focus Groups, Delphi-Method/ Expert Survey, Usability-Studies)

Updated: September 2024

- Applying Methodic Approaches for National and International Market and Media Research
- Case Studies

4 Participation Requirements

None

7

5 Method of Examination

Written module exam for all three subjects (exam duration is 120 minutes).

6 Credit Points Requirement

Pass the module exam.

Weight of Grade for Final Score

Graded according to § 22 Para. 2 of the examination regulations (MPO).

8 Module Representative and Lecturer(s)

- a) Prof. Dr. Christoph Schmidt (module representative)
- b) Sabrina von Burgsdorff
- c) Barbara Cholewa
